Blackhawk Farms Raceway/August 8-9, 2009/NASA Midwest

QUACK QUACK Blackhawk

To say it was a little damp for the NASA Midwest August trip to BLACKHAWK FARMS would be a bit of an understatement. If you want to see some photographic evidence simply go to the Midwest forum and there is a thread with pictures. Saturday morning was a washout with the first session being delayed because of lightening! By Saturday afternoon the sun came out and some good times were run. Sunday was just the opposite with the final two sessions of the day being in the rain.

Most of the usual suspects were there and we were joined by a couple of new TT'ers Eric Pratt and Roger DeHaan. Welcome to the fray!

For Nathan Pitcher and his AMS PERFORMANCE #929 Evo, it was his first trip to Blackhawk. Judging by the results he will be happy to go back as he obliterated the old TTB track record by just short of five seconds, setting a new mark in TTB of 1:19.379. Now that is smoking!

Bryce Austin won TTC on Saturday with a 1:22.127 and TTA on Sunday with a 1:21.068. The rest of the fast times for the weekend were Jose Petri in TTE with a 1:25.568, Bill Marquardt in TTF with a 1:32.359, Geff Sawtelle in TTS with a 1:16.253, and Don Guest in TTU with a 1:17.258.

Thanks again to HOOSIER TIRES AND HAWK BRAKE PADS for their support of the Midwest TT program. Their top quality products have become the tires and brakes of choice for the top placing time trial competitors!

Geff Sawtelle
