Chicago, December 7 2009, NASA Midwest, Inc.

NASA Midwest is pleased to announce two new Series Directors. Ryan Groth will take over as Spec Miata Series Director for NASA Midwest and Michael Osborne takes over Spec E30 in NASA Great Lakes and Midwest. We wish to thank Brian Domont (MW SM Director) and Simon Hunter (GL & MW SE30 Director) for their hard work and efforts over the last few years.

Ryan began driving with NASA in HPDE1 during the 2005 season. Since that time he worked through the ladder system to Time Trials in 2008 and finally made the big jump to Comp School in his Spec Miata at Road America in April of 2009. Ryan capped a fantastic 2009 season with 2nd in the SM Championship and NASA Midwest Rookie of the Year.

Michael has been driving in DE since 1998. He stepped up to NASA Competition and won GTS1 at the inaugural NASA National Championships in 2006! He built his Spec E30 car in 2007 and has much fun and good success since. All of Michael's track experience has been in BMW's!

"I am very pleased that we have brought these two fine young enthusiasts on board as Series Directors for 2010. I'm looking forward to helping them both grow their respective classes and enhance our drivers experience." said Bryan Cohn, Director of Competition, NASA Midwest, Inc.

Dave Royce, Region Director of NASA Midwest, Inc said, "I'm pleased to have Ryan and Michael join our team for 2010."
