Chicago, April 26, 2011, NASA Midwest, Inc.

Another FANTASTIC weekend was enjoyed by the NASA competitors at Joliet, Illinois's famed Autobahn Country Club. The weather was superb with temperatures reaching a balmy 42 degrees on Saturday with a mixture of 75% rain and 25% snowflakes/sleet. Sunday was even better with much lower humidity and not a snowflake in the sky! Ah, it just doesn't get much better.

Twenty-five brave souls signed up for the inaugural TT event of the 2011 season and several track records were established. Nathan Pitcher won TTA both days in his AMS PERFORMANCE/WINNING FORMULA sponsored Mitsubisji Evo, establishing a new track record of 1:32.187 on Sunday. TTB was won by Ian Stewart in his KRONOSPARK POWER SYSTEMS sponsored Nissan 350Z on Saturday and by Randy Johnson in his Subaru WRX STi on Sunday. Roger DeHaan took home the 1st place hardware in TTC on Saturday driving a BMW M3 and Patrick Reyes grabbed 1st on Sunday in his Honda S2000. TTD was won both days by Luke Perkowski driving a BMW 328is. Mike Weber won TTF both days on his way to establishing a new track record of 1:43.103 in his Infiniti G20. Another track record of 1:32.690 was established by Richard Mattson in TTR driving his PFADT PERFORMANCE PRODUCTS/APR sponsored Chevrolet Z06. Greg Vannucci won TTS on Saturday driving a Lotus Exige and Ryan Winchester took home the trophy on Sunday driving his WINSPO RTS sponsored Ford Mustang GT. And finally, rounding out the Time Trial competition classes was Andrew Clos in TTU driving his Mazda Miata.

Congratulations to all of our competitors for another highly successful weekend of competition with the NASA family! It was fantastic to see all the familiar faces and welcome several new competitors to the ranks. Thank you to HOOSIER TIRES, and HAWK BRAKES for their continued support of the NASA TT program.
